

BAGCRAFT®

FULL LINE PRODUCT CATALOG

PAPER-BASED SOLUTIONS FOR BETTER FOOD PACKAGING

Bagcraft is one of the largest paper-based, flexible foodservice packaging manufacturers in North America, with six manufacturing plants spread across the United States. We provide a broad range of paper-based specialty food-packaging products for restaurants, supermarkets, convenience stores, bakeries, food processors and more.

Our products include specialty bags, sandwich wraps and other specialty sheet and roll products. Our popular EcoCraft® brand features a line of foodservice packaging made with natural kraft paper.

SUSTAINABILITY VISION

The Novolex vision for sustainability is to innovate more sustainable choices for our customers, operate responsibly and invest in our people and communities. We bring this vision to life every day through our ongoing focus on efficiency in our operations, as well as through partnerships with customers, suppliers, communities and others in the industry to develop solutions that reduce the impact our products can have on the environment.

■ Novolex sustainability partnerships

The mark of
responsible forestry

Forest Stewardship Council®

The FSC® promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests. The unique role of the FSC is to bring together people, organizations and businesses to develop consensus-based solutions that promote responsible stewardship of the world's forests. Novolex uses the FSC Trademark License FSC®-C010800 for certified chain of custody products made at all Duro plants.

Sustainable Forestry Initiative

SFI Inc. promotes sustainable forest management in North America and supporting responsible procurement globally. SFI Inc. directs all elements of the SFI program including the SFI forest management, fiber sourcing, and chain-of-custody standards, labeling and marketing. SFI certified products provide assurance that the paper used in these products represent a sound environmental choice with raw materials from certified forest content or certified sourcing. Novolex products produced at Duro Bag, Bagcraft, Deluxe and Burrows Packaging are eligible for SFI Certified Sourcing or SFI Chain of Custody logo use. Novolex uses SFI Trademark License Code 01567.

Biodegradable Products Institute

BPI is North America's leading certifier of compostable products and packaging. Their certification program ensures that products and packaging displaying the BPI logo have been independently tested and verified according to scientifically based standards—ASTM D6400 or D6868 standards—for Novolex products. The BPI logo also helps industrial composters know that our products will break down as expected and contribute to healthy soil amendment.

Compost Manufacturing Alliance™

CMA is a global leader in providing industrial composting facilities an acceptance standard for compostable products. They perform field disintegration testing through several prominent processing methods to ensure products sent to industrial compost facilities adequately break down within the production cycle. CMA connects supply chain leaders with top compost manufacturing facilities nationwide to ensure mutual success as co-creators of compost and compostables.

American Society For Testing And Materials (ASTM)

This specification establishes the requirements for labeling of materials and products (including packaging), wherein a biodegradable plastic film or coating is attached (either through lamination or extrusion directly onto the paper) to compostable substrates and the entire product or package is designed to be composted in municipal and industrial aerobic composting facilities. In order to compost satisfactorily, the product must demonstrate each of the three characteristics as follows: (1) proper disintegration during composting; (2) adequate level of inherent biodegradation; and (3) no adverse impacts on the ability of composts to support plant growth.

Sustainability brands

Dubl Life® is a brand of flexible foodservice and carryout packaging made from 100% Recycled Paper. The Dubl Life brand drives awareness of the benefits of recycling and promotes the use of packaging solutions with post consumer material content.

EcoCraft® is Bagcraft's unique brand of brown kraft paper products. Each item throughout the EcoCraft line has a sustainability component, whether it be compostable, recyclable, or made with recycled content.

How2Recycle® and consumer education

As part of our commitment to consumer education, Novolex uses the How2Recycle® and How2Compost™ labels on stock products and works with customers to encourage their use on branded items.

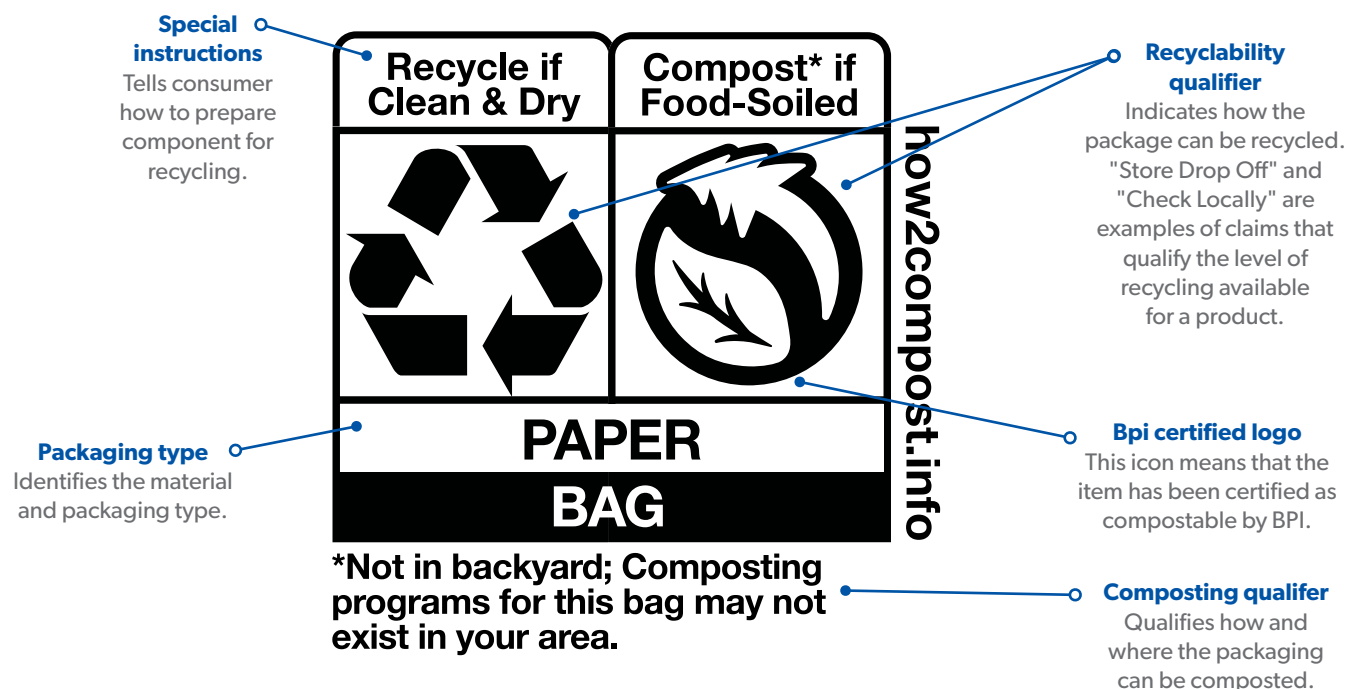

Member of
How2Recycle®

How2Recycle® is a standardized labeling system that clearly communicates recycling instructions to the public. When applicable, it includes instructions on how to properly clean a product before recycling.

Member of
How2Compost

How2Compost™ labels inform consumers if a product is compostable in commercial composting facilities. The label is available to use on packages that have gone through the Biodegradable Product Institutes (BPI) certification process. BPI certification is open to products that meets the requirements in ASTM D6400 or D6868 based on testing in a BPI-approved laboratory.

Custom converting printing capabilities

Our efficient presses deliver state-of-the-art graphics capabilities to differentiate your products on the shelf and on the go. Our commitment to innovative solutions enables us to expertly consult with you on packaging design.

CUSTOM ORDER INFORMATION FOR QUOTES

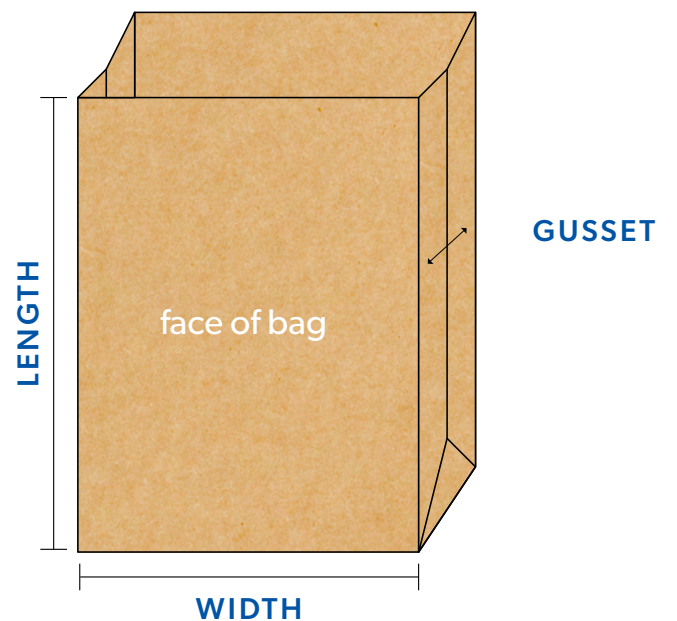

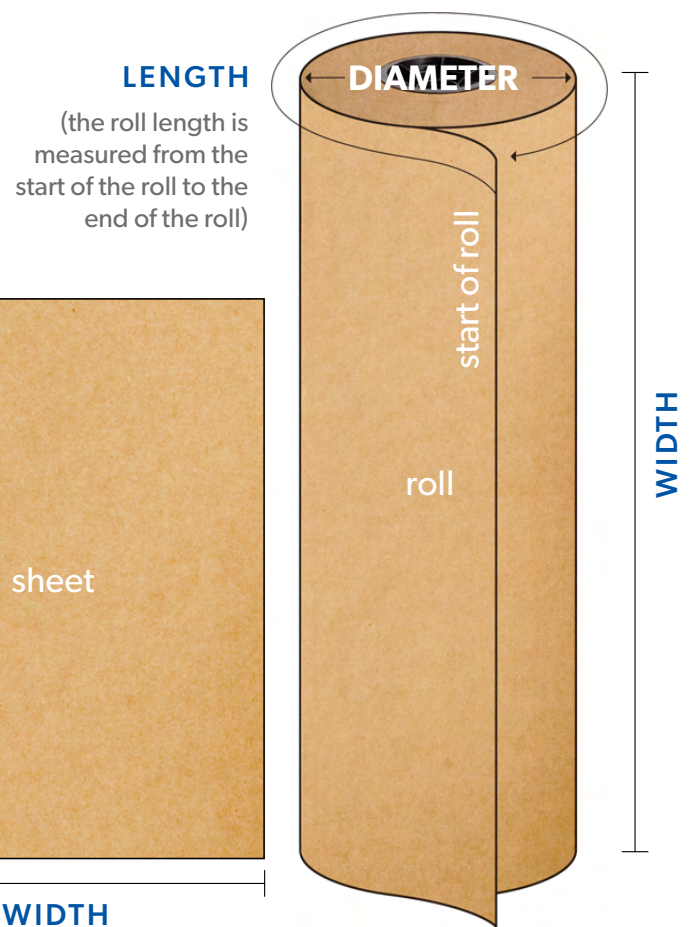

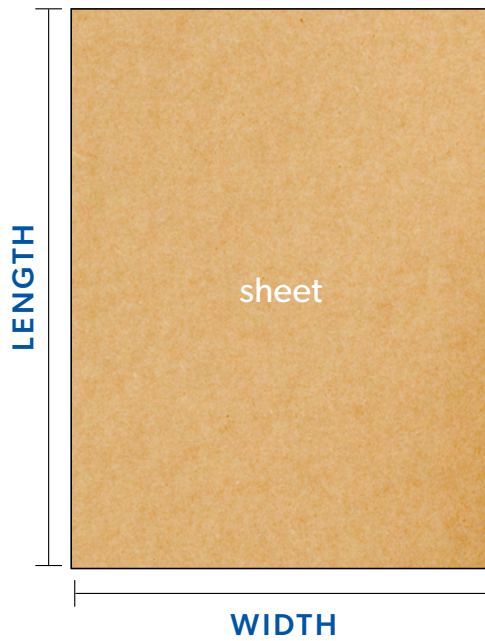

- Bag (width, gusset, length)
- Sheet (width and length)
- Roll (roll width and length or outer diameter)
- Initial order quantity needed and the annual volume (units or cases)
- Name of printed design or logo
- Basis weight of paper if known
- Type of paper or combination of materials (foil, bio-film or glassine)
- Provide an explanation of the proposed window die or panel location on the package
- Number of printed colors (provide PMS numbers)
- Product application (what will the package be used for?)
- Case pack sizes (inner and total)
- Shipping/distribution information

HOW TO MEASURE A BAG FOR QUOTES AND PRODUCTION: See page 7

- Measure the face of the bag (width)
- Measure the gusset of the bag (side width)
- Measure the length of the bag (not including lip)

For additional informations, contact your Novolex® Sales Representative.

■ Standard release pan liners

PERFORMANCE FEATURES

- Premium full and half pan liners
- Good for products with low sugar content
- Provides excellent moisture protection
- Kosher certified

Power Prep™ wrap

PERFORMANCE FEATURES

- Grease resistant paper with PET insulated laminate that performs across multiple temperature requirements and provides excellent moisture protection
- Maintains food quality as product moves from the freezer to thawing and re-heating in store, and, while held under heat
- Lamination is designed with unique anti-curling to allow flat sheeting providing time-savings and efficiency to quickly wrap and freeze product at scale
- More puncture resistant than foil or foil/paper structure
- Alternative to foil and other sandwich packaging options

The advantages of EcoCraft® clamshells

PERFORMANCE FEATURES

- **Sturdy:** the Eco-Flute® construction provides superior rigidity and crush strength.
- **Insulated:** the corrugate layer helps to keep hot food hot and cold food cold.
- **Food Integrity:** the lightweight Eco-Flute material allows for moisture vapor transmission and resists grease to keep foods fresh and crisp.
- **Steam Release:** select the right level of venting for each food type with multiple articulated vents.
- **Visibility:** windowed clamshells can improve order accuracy.
- **Ease of Use:** easy to store, easy to load and easy to lock.

Appetizers and snack container

PERFORMANCE FEATURES

- Provides excellent moisture protection
- Retains heat
- Sturdy and lightweight

EcoCraft clamshells are constructed from Eco-Flute®, a micro-flute technology that utilizes recycled, post-consumer content to provide a sturdy, lightweight package. These containers resist grease and retain heat.

The medium layer of Eco-Flute is 100% post-consumer recycled content (PCR) paper, making the clamshell a minimum of 33% PCR.

NovoVue™ Rollstock

Our wide diversity of capabilities combined with an experienced packaging design and innovation team has brought Novolex to the forefront as a leading flexible packaging supplier to the top 25 restaurant and supermarket chains across North America.

OVERVIEW

- Precise laser cutters produce boundless options of intricate window shapes
- Finished products can have high definition 10 color process printing with die-cut window
- Integrated, advanced laminator yields more durable seals for continuous or die cut windows
- Works with a variety of substrates geared towards form, fill and seal machines
- Works with many films including PET, PP, PE, PLA, foil and COEX films

KEY FEATURES

- 1 Dynamic capabilities for unique packaging designs
- 2 Continuous window capabilities
- 3 Anti-Fog window offers clear visibility
- 4 Paper packaging provides a handcrafted appearance
- 5 Custom precision laser cut

PAPER-BASED SOLUTIONS FOR BETTER FOOD PACKAGING

SUSTAINABILITY VISION

The Novolex vision for sustainability is to innovate more sustainable choices for our customers, operate responsibly and invest in our people and communities. We bring this vision to life every day through our ongoing focus on efficiency in our operations, as well as through partnerships with customers, suppliers, communities and others in the industry to develop solutions that reduce the impact our products can have on the environment.
