

# **Cascades PRO<sup>®</sup>**

All clean. All good.

# Driven by Change, Powered by Sustainability<sup>™</sup>

A photograph of four rolls of white paper towels standing on a light-colored wooden block. The rolls are arranged in a slightly staggered fashion, with some partially overlapping. The background is a dark, textured green.

## **Compostability Certification Added**

Our mission at Cascades is, and has always been, to improve, innovate and generate positive impacts in the name of sustainability for our team, our customers and the end-users we work alongside. We are furthering our commitment to being sustainable and are proud to share that we've received certification from the Compost Manufacturing Alliance (CMA), a global

leader in industrial composting standards, for 13 of our products – 6 hand towels, 4 napkins and 3 Kitchen Roll Towels. When it comes to sustainability, even the smallest steps count, and we are focused on doing what we can as a business to drive positive change and reduce our overall environmental footprint.

# Did you Know?

## It's in Our DNA

That Cascades was a pioneer of the circular economy? The company has been demonstrating the potential of all kinds of residual materials since 1964, recycling and transforming them into new products.

## What is Recycling?

Recycling is the action or process of converting waste into reusable material.

## What is Composting?

Composting involves a product that can break down into natural elements in a compost environment (usually within 90 days) and causes no harm to the environment.

## Leader in Sustainability

That Cascades was recently named as the 18th most sustainable company in the world by Corporate Knights (and first in the packaging industry)?

## To Be or Not to Be

That while all compostable products are biodegradable, not all biodegradable products are compostable?

## Let's Break it Down

That there are two primary differences between composting and biodegradable: Time to break down and environmental conditions?

## Certification Legend

CMA \* is a global leader in providing industrial composting facilities an acceptance standard for compostables by performing field disintegration testing through several prominent processing methods to ensure products sent to industrial compost facilities adequately break down within the production cycle.

Certified for chlorine-free processing, energy and water efficiency, and 100% recovered/minimum 25% (bath tissue) or 50% (towels/napkins) post-consumer content. GreenSeal.org/GS1.

Product certified for reduced environmental impact.

100% of the electricity used to manufacture this product is matched with certified wind energy.

International certification and labeling system dedicated to promoting responsible management of the world's forests.

\* Products with this certification are suitable for industrial and municipal composting facilities, not for home composting. Please check locally, facilities may not exist in your area.
