

Energizer®

**There is a *SMALL* item in homes
that can cause a *BIG* problem.**

KNOW

- ✓ the devices in your home that use coin lithium batteries
- ✓ the symptoms of coin lithium ingestion

SECURE

- ✓ your home by keeping loose batteries locked away
- ✓ your devices by sealing with tape, if they don't have a screw compartment

CHOOSE

- ✓ the lithium coin battery with more safety features than any other brand

Energizer is the leader in coin lithium safety.

World's First 3 in 1 Child Shield™

**The only coin lithium cell with
3 lines of defense.**

CHILD SECURE PACK

Child-resistant packaging is the **FIRST** line of defense providing security, making them almost adult proof and possibly need scissors to open it. *Energizer* was the first to introduce child-resistant packaging that was thoroughly tested and certified by a 3rd party, ensuring all standards are met.

BITTER TASTE

As a **SECOND** line of defense, bitter coating is applied to the cell to discourage swallowing and help prevent ingestion. All that while maintaining compatibility with devices and performance.

COLOR ALERT TECHNOLOGY

The **THIRD** line of defense. Color Alert triggers visible blue dye in mouth indicating the battery has interacted with saliva and medical attention is required as injury can occur in less than two hours. *Energizer* is the world's first battery with color alert technology that is safety you can see.
