PROBING QUESTIONS

- Are you using disinfecting wipes today?
- Do you have products available for employees to clean and disinfect their workspaces and breakrooms?
- Do you have a solution to help sanitize soft surfaces like sofas and chairs?

DID YOU KNOW?

- **Using disinfecting wipes** can reduce cleaning and disinfecting time by up to 87.5%, compared to trigger spray*
- **Bacteria can harbor on soft surfaces.** Lysol® Disinfecting Wipes can be used to kill 99.9% of bacteria on soft surfaces like couches, backpacks, and office chairs*

OVERCOMING OBJECTIONS

My facility has a cleaning staff that cleans our facility.

Disinfecting Wipes are easy, convenient solutions for employees to quickly clean and disinfect their spaces during the workday when cleaning staff is not available, like desk areas and breakrooms.

My facility only uses "green" products.

Lysol® Disinfecting Wipes with Plant-Based Fibers is 95% USDA Biobase Certified, is made from 100% plant-based fibers, and uses an active ingredient derived from nature.

WHAT'S IN IT FOR YOU?

Easy Add-on.

Disinfecting Wipes are easy add-on items for any facility for use throughout the day, which can create repeatable business. Perfect for entrance areas, workspaces, conference rooms, and break rooms.

Relevant for all sectors.

Disinfecting wipes are highly versatile and valued across facility types, from offices and schools to warehouse and manufacturing.

*Calculation based on ISSA cleaning times data shows that over the course of one year, up to 1445 hours of disinfection time can be saved using surface wipes, compared to a two-step trigger spray and cloth.

When used as directed. *Compared to Lysol® Disinfecting Wipes 80ct canister.
