

## DEGREASER OPPORTUNITIES IN

# MANUFACTURING

### CLR PRO MAX® INDUSTRIAL DEGREASER

Effectively penetrates and  
dissolves heavy grease,  
oil, and grime.

Available in 32oz, 1, 5, 55, and 275 Gallons

## FACILITIES MAINTENANCE

- ❑ Employee restroom cleaning - removes soap scum, body oils, and tracked-in industrial contaminants from floors and surfaces
- ❑ Cafeteria and break room kitchens - tackles cooking grease and oil buildup in employee dining facilities
- ❑ Floor scrubber solution - creates effective cleaning systems for removing embedded oils and industrial grime
- ❑ Parts washer maintenance - cleans automotive and equipment parts in facility maintenance shops
- ❑ Custodial equipment cleaning - removes buildup from floor machines, buffers, and cleaning tools

## INDUSTRIAL

- ❑ CNC machine cleaning - removes machining oils and metal particulates from equipment housings
- ❑ Hydraulic press maintenance - addresses oil leaks around equipment
- ❑ Robotic arm components - cleans precision parts and housing without equipment damage
- ❑ Production floor degreasing - tackles oil spills and tracked grease in manufacturing areas
- ❑ Control panel exteriors - safely removes accumulated oils and industrial dust

## DEGREASING OPPORTUNITIES IN **MANUFACTURING**

### **CHEMICAL PROCESSING**

- ❑ Pump and compressor housing cleaning - removes process oils and lubricants from equipment exteriors
- ❑ Piping support structure maintenance - addresses environmental oils and chemical residues
- ❑ Tank farm area cleaning - eliminates spilled chemicals and lubricant buildup around storage areas
- ❑ Maintenance equipment cleaning - removes oils from tools and repair equipment
- ❑ Loading rack maintenance - tackles chemical spills and equipment lubricant buildup

### **STEEL MILLS**

- ❑ Rolling mill equipment cleaning - removes lubricating oils and metal particulates from machinery housings
- ❑ Crane and hoist maintenance - addresses hydraulic fluid buildup and environmental contaminants
- ❑ Furnace area cleaning - tackles oil spills and lubricant residues on non-process surfaces
- ❑ Conveyor system maintenance - eliminates grease buildup from material handling equipment
- ❑ Heavy equipment cleaning - removes hydraulic oils from cranes, loaders, and transport vehicles

### **AUTOMOTIVE**

- ❑ Assembly line equipment cleaning - removes lubricating oils from robotic systems and conveyors
- ❑ Paint booth maintenance - addresses overspray and equipment oils on non-painting surfaces
- ❑ Engine test stand cleaning - eliminates oil residues and coolant buildup
- ❑ Stamping press maintenance - removes forming oils and hydraulic fluid residues
- ❑ Tool and die cleaning - extends equipment life by removing buildup and contaminants

### **PHARMACEUTICAL**

- ❑ Equipment housing cleaning - removes lubricating oils from non-product contact surfaces of manufacturing equipment
- ❑ Maintenance workshop areas - cleans tools and equipment used for facility upkeep
- ❑ Loading dock maintenance - addresses delivery vehicle oils and tracked contaminants
- ❑ HVAC system cleaning - removes oily buildup from air handling components
- ❑ Utility room equipment - cleans compressors, pumps, and mechanical systems

#### **CLR PRO MAX® INDUSTRIAL DEGREASER**

Effectively penetrates and dissolves heavy grease, oil, and grime.

Available in 32oz, 1, 5, 55, and 275 Gallons

## DEGREASING OPPORTUNITIES IN **MANUFACTURING**

### **MACHINE SHOPS**

- ❑ CNC machine cleaning - removes cutting fluids, coolant residue, and metal particulates from machine housings
- ❑ Lathe and milling equipment maintenance - eliminates oil and grease buildup from moving components and guideways
- ❑ Parts washer solutions - cleans machined components and tooling before inspection or assembly
- ❑ Workbench and tool cleaning - removes cutting oils and grease from hand tools and work surfaces
- ❑ Shop floor degreasing - tackles tramp oil, coolant spills, and tracked metal shavings in high-traffic areas

### **PULP & PAPER**

- ❑ Paper machine cleaning - removes lubricating oils and pulp residues from equipment housing
- ❑ Conveyor belt maintenance - eliminates grease buildup from material transport systems
- ❑ Hydraulic system cleaning - addresses oil leaks from press and forming equipment
- ❑ Boiler room maintenance - removes fuel oil residues and equipment lubricants
- ❑ Maintenance shop equipment - cleans hydraulic tools and repair equipment

### **TEXTILE**

- ❑ Fabric processing equipment cleaning - removes oils and lubricants from machinery housings
- ❑ Dyeing equipment maintenance - addresses process oils on non-fabric contact surfaces
- ❑ Spinning and weaving machine cleaning - eliminates lubricant buildup from mechanical components
- ❑ Finishing equipment maintenance - removes chemical residues and equipment oils
- ❑ Material handling system cleaning - tackles oils from conveyor and transport equipment

#### **CLR PRO MAX® INDUSTRIAL DEGREASER**

Effectively penetrates and dissolves heavy grease, oil, and grime.

Available in 32oz, 1, 5, 55, and 275 Gallons
