IMPACT OF COLD & FLU ON YOUR FACILITY

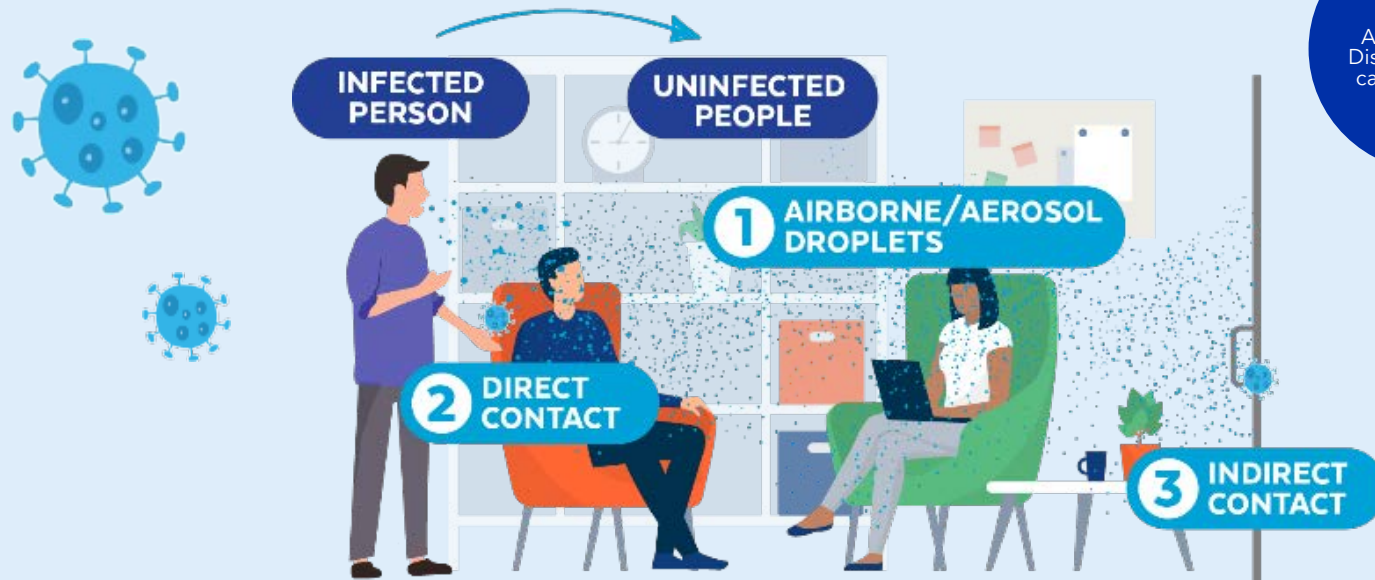

STAY AHEAD OF COLD & FLU SEASON

COLD & FLU CAN SPREAD IN MULTIPLE WAYS

DO YOU KNOW?

- What everyday items are as dirty as a toilet seat?
- What office object is as dirty as a bathroom floor?
- How much more polluted can indoor air be than outdoor?

A single Lysol® Disinfectant Wipe can kill 99.9% of germs* on a doorknob.

A sneeze can travel as far as **27 feet⁴**

From one contaminated door handle, viruses can transfer to the hands of **14 people⁵**

A single infected person in the office can spread a virus to up to **50% of shared surfaces & objects⁶**

¹Professional Lysol® Disinfectant Spray and Lysol® Disinfecting Wipes are effective against Influenza A Virus (H1N2) (H5N6) (H5N8) (H9N2), SARS-CoV-2 (COVID-19 Virus), Human Metapneumovirus (HMPV), and Middle East Respiratory Syndrome Coronavirus (MERS-CoV) in 15 seconds, when used as directed

²Lysol® Disinfectant Spray is effective on hard and soft surfaces.

RESPIRATORY VIRUSES

FLU

- Influenza virus

COLDS

- Rhinovirus
- Respiratory syncytial virus (RSV)
- Parainfluenza virus
- Coronaviruses

HERE'S THE POINT!

FLU is more severe than a cold, especially for vulnerable groups it can even be fatal.

COLDS and other respiratory illnesses are usually milder but can still cause serious complications.
