a new way to refill

our refill bottle is now made from 100% collected + recycled plastic (minus cap)

refills bottle 2.8x (to be exact)

collection program gives back to communities*

old packaging new packaging

*In partnership with SC Johnson and PlasticBank, we've transitioned all our packaging to 100% collected + recycled plastic (minus cap). Recovered coastal plastic has been collected on land, within 51 miles of the coast, to stop it from ending up in the ocean or a landfill. This program not only cleans up the environment but also provides direct economic benefits to the communities who collect it.
