

*our*fresh 2.0™

The Modern Solution to Metered Aerosol

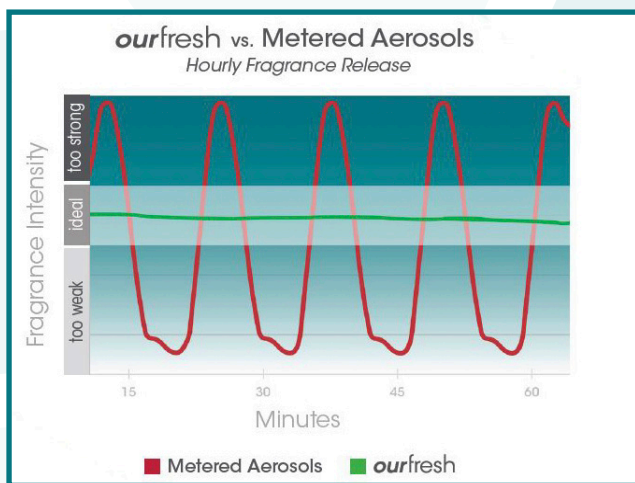

fresh™
PRODUCTS

Keeping your world smelling fresh.

Tired of putting up with the wet sticky residue of metered aerosols? Then put up *ourfresh* 2.0.

Metered aerosol has been around forever, and it shows. They are clunky, messy and bad for the environment. Metered aerosols only provide an 'ideal' experience about 20% of the time. If a user walks in right after it sprays, it's overwhelmingly strong. If they walk in 5 minutes after it sprays, it can't be detected. There is a very small window when it's just right, so why pay for a product that only works part of the time?

ourfresh 2.0 dispensers and refills have been strategically designed to provide premium performance. That means users have a great experience every time because of its consistent dry fragrance release.

Premium Performance

- People's perception of how strong or weak a fragrance is, determines their experience
- *ourfresh* 2.0 is consistently in the 'ideal' range
- Metered only hits the 'ideal' range about 20% of the time

ourfresh 2.0

The 30-day air freshener

THE SMART SOLUTION

Why ourfresh 2.0?

ourfresh 2.0 has been carefully engineered to deliver the perfect amount of fragrance each day for 30 days without that 3-4 week drop off. There are audio and visual indicators that activate when it's time to replace the battery and refill, so you don't have to remember. ourfresh is also efficient, it only works when the lights are on so there's no wasted fragrance and the refills are eco-friendly. Better air care results in better experiences for you, your employees and your customers. Fresh Products believes in making products that perform, are simple to use and make life easier.

THE GREEN SOLUTION

Eco-Friendly Refills

ourfresh 2.0 refills are a dry fragrance so its light weight and stays in the air to fill the room. They are 100% recyclable and contain a biodegradable additive. Metered aerosol fragrance starts strong and dissipates quickly. They contain propellants and acetone that leaves residue, damages floors and are extremely flammable.

THE EASY SOLUTION

To Install & Refill

ourfresh 2.0 should be mounted about 6 feet from the floor in the center of the space so there's no ladder required to install or refill the dispenser. 6 feet is more at head level where fragrance is best detected and not at the door. Metered is always placed near the door so people can smell it when they enter and leave, but what about while they are in the room? Isn't that typically where fragrance is needed most?

Better Air Care. Better Experiences.

Great for Medium Spaces

Restrooms • Conference Rooms • Lobbies • Hallways

Tech Specs

Light Sensitive - fan runs at regular program setting when there is light (natural or artificial) and runs at half program when dark

Requires one C Alkaline Battery (included with each refill)

Removing the battery starts the program over at day one

GREEN light blinks every 15 seconds when program is running

RED light blinks on day 30 or if the battery is low

↑ Intensity
