

DO YOU KNOW THE NEW SCHOOL RULES?

Providing menstrual care products is becoming the law.
We are here to help.

It started with NYC and is now the law in Illinois, California and New York.

Don't wait for a law to do the right thing!

It's as easy as 1, 2, 3 and A, B, C!

NEW YORK CITY & STATE

New York City: June 2016
New York City passed the first legislation in the U.S. to ensure free menstrual products in the restrooms of all public schools, shelters and jails. School initiative has resulted in a reduction in absenteeism.

New York State: April 2018
Schools in New York State are required to provide free menstrual products in restrooms for girls in grades 6 through 12.

"Providing young women with pads and tampons in schools will help them stay focused on their learning and sends a message about value and respect for their bodies."

- Council Member Julissa Ferreras-Copeland

ILLINOIS

State of Illinois: August 2017
The Learn with Dignity Act was passed - Public Act 100-0163. Starting January 1, 2018, Illinois school districts and charter schools will be required to provide feminine hygiene products (tampons and sanitary napkins) in bathrooms of school buildings for free.

"This is an important law that will assist young women across the state. In the same way we expect to have toilet paper and soap in bathrooms, we should expect the same with feminine hygiene products."

- IL State Representative Litesa E. Wallace

CALIFORNIA

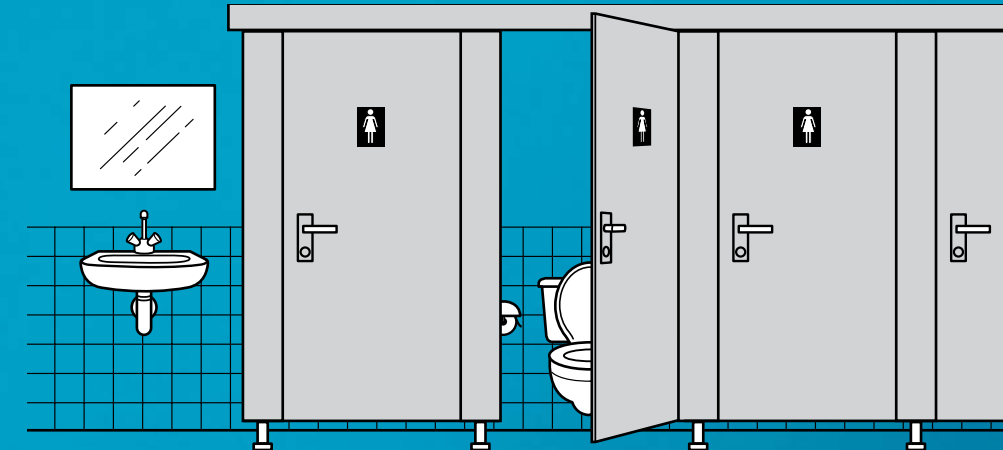

California: October 2017
Assembly Bill 10 was signed, requiring public schools having classes from grades 6-12 where at least 40% of the students meet the federal poverty threshold to stock half of the school's restrooms with free feminine hygiene products.

"To me this bill is not just about a medical necessity, but about access to education. A lot of young women tell us that they miss school because they cannot afford these products."

- Assembly Member Cristina Garcia

STEP 1: Site Analysis

We offer an analysis that tells you precisely where and how menstrual care products might be added to your washrooms. Our experts look at your entire facility, and in the case of campuses, can offer comprehensive, building-by-building recommendations and an evaluation of your existing disposal method. The end result is a plan that makes most efficient use of available space and resources.

How the Audit Can Help

Survey results can offer savings in a number of ways. Buying the right number of right sized dispensers is just the beginning. Higher quality, longer lasting ADA-compliant dispensers and easier to service disposal bins will make happy the building services and janitorial teams who will be interfacing with the equipment long after the initial installation.

In short, solutions born out of a formal facility audit can improve compliance and help identify the proper equipment that will provide the best long-term value for a school system.

Menstrual care is part of what constitutes a well-appointed restroom, one that has public health at its core.

We make the change easy for you by offering a complete site analysis for restrooms in your facility — or even district wide. Our simplified product selection guide makes HOSPECO a single source.

STEP 2: Choose the required products

HOSPECO carries the most complete line of menstrual care products for the "away from home" market, including tampons and pads; product dispensers; and safe, hygienic disposal equipment. Our analysis will outline those products that fall within the scope of the new laws, but will also include recommendations for ancillary products designed to improve the appearance of your restrooms, protect the health of your maintenance staff, and prevent behaviors that could damage the plumbing of your facility.

The Optimal System

Personal care is part of what constitutes a well-appointed restroom, one that has public health at its core (much as soap and water do currently.) Choosing the optimal system is easy as 1-2-3. It consists of dispensers, vended product and a safe and sanitary method of disposal.

 = denotes optimal system products

 All Evogen® FREE vendors include a patented time delay mechanism between vends, discouraging repeat vends.

Safe and sanitary disposal is an important part of a complete personal care solution for public restrooms.

With no safe and sanitary way to dispose of used products, people may wrap them in toilet paper or just throw used products into waste receptacles unwrapped — or worse, flush them down the toilet.

Choose the correct fitting liner bag to follow OSHA expectations.

OSHA does not generally consider discarded feminine hygiene products, used to absorb menstrual flow, to fall within the definition of regulated waste.

However..
OSHA expects these products to be discarded into waste containers which are lined in such a way as to prevent contact with the contents. Please note, however, that it is the employer's responsibility to determine which job classifications or specific tasks and procedures involve occupational exposure.

"Scensibles System has worked wonderfully for us and it's one of the best things we've done to improve restroom appearance, odor control, and assurance of proper disposal."

— Don Sullivan, Manager of Custodial Services, University of Massachusetts at Amherst

SBX50

Helps to prevent costly plumbing problems caused by flushing used product.

“This issue is common sense. Every bathroom provides toilet paper, soap and paper towels which are expected, while another crucial hygiene necessity is absent. When you use a public restroom, you should have everything you need for proper hygiene.”

- WI State Representative Melissa Sargent

STEP 3: We will guide you along the way!

Period Partner

Learn more about the movement by visiting hospeco.com/periodpartner

We see menstrual care solutions to be as necessary as soap, toilet paper, and paper towels. We champion universal access because, let's face it, this isn't a topic people talk easily about. When designing restrooms and specifying their equipment, few consider the stigma of being left unprepared while away from home should your period come unexpectedly. For this reason, and because "it's always been this way", many public washrooms offer nothing.

Let's change that.
