

■ kraft paper bags - psychiatric units

1,500 suicides take place on inpatient psychiatry units in the United States each year. Understanding the methods and the environmental components of inpatient suicide may help to reduce its incidence. Evaluating all aspects of patient surroundings helps to mitigate risk.

Poly liners should not be used in psychiatric wards or anywhere in inpatient facilities where there could be the risk of asphyxiation.

Hospeco offers the following alternatives to line waste containers:

Item #	Description	Capacity	Dimensions	Selling Unit
HS-KLL	Kraft Lawn and Leaf Bag	30 gallon	16" x 12" x 35"	50/bale
