Your Go-To for Cleaning Products

Cleaning & Dusting

Did you know?

The average surface like a photocopier may be touched more than 300 times per day. Surfaces like these and door handles are some of the most touched spots in the office posing the biggest threat to health.

To ensure your antibacterial cleaner is effective while cleaning, let it rest on surfaces for 30 to 60 seconds before wiping it away.

A survey by office supplies company Viking, found the bacteria Staphylococcus on 60% of desks it checked.
