

Floorcare

Your Go-To for Cleaning Products

Floorcare

Did you know?

The type of mop you need can vary based on the type of surface you are cleaning.

Flat mops are good for vinyl or hardwood since they don't use a lot of water.

Sponge mops are effective for absorbing spills.

Dust mops are used to remove dust and debris on the ground.

String mops are common and come with a bucket where the washing liquid is stored.

Strip mops can be used wet or dry. When they're dry, dust is easily removed from surfaces without spreading around.

Microfiber mops are as effective as a sponge and easier to clean.

Brush mops are a combination of a broom and a mop. They can be used to clean the floor, but with can scrub stains out with added bristles.

Mop Wringer & Bucket Combos

8Y/2637-3Y

Sidepress Combo Water Management System

Pressure-balanced Sidepress applies even pressure to the mop head and quickly channels dirty water away from mop.

- Wave arresting water diffuser reduces spills
- Longer wringer handle generates greater pressure; posi-grip handle, non-marking castors
- Integrated hold-areas for a wet floor sign, mop handle and putty knife
- Stable base and caster placement increases tip resistance and maneuverability
- Optional dirty water bucket captures waste water, increasing square feet cleaned per gallon. Optional sediment drain grate traps waterborne sediment in bottom of bucket.

Household Invention

The household mop as we know it was first invented by Thomas W. Stewart. On June 11, 1893, he was awarded U.S. patent #499,402 for his design of a mop with a removable yarn mop head and a clamp that could wring out water without users getting their hands wet.

"Cheaper" Mops Cost More in the Long Run

While microfiber mops can cost up to three times the price of traditional cotton mops, they last for significantly more washings (some up to 500) and maintain effectiveness much longer. Microfiber technology affords durability and effectiveness that maximizes the ROI within the first 150 washings.

Using Wet Floor Signs Effectively

Once you are aware of a wet floor, your duty to protect takes two stages. The first is to warn others of the hazard. This is where your wet floor sign comes in. The second step is cleanup. Using a mop or other means, the moisture should be reduced to ensure that the floor will dry within a reasonable amount of time exposed to the open air.
