# Receptacles & Material Handling

## Did you know?

In Industry, Material Handling can be defined as the control, protection, storage and movement of materials not only throughout a companies value added process, but also their entire supply chain. Without material handling, the entire value stream comes to a screeching halt.

Outside of Industry, Material Handling can be defined as the movement and storage of almost any object. Think about storing things on a shelf in your garage, using a boat lift at a marina, using a wheelbarrow in your garden, using an engine hoist to remove your cars engine or loading a bike into a car mounted rack.

## Gator® Plus Containers & Lids

### Gator® Plus Containers

Added Features like venting and cinches in our Gator® Plus series set them apart from the standard Gator®.

- 6 air-venting passages provide up to 75% reduction in the force to remove a filled liner
- Built-in poly bag cinches keep liners in place
- Deeper wider bottom hand grip pockets slot for easier container dumping
- Offset ridge design allows container to nest without jamming

### Color Coding Reduces Cross-Contamination

Cross-contamination occurs when germs and bacteria are transported from one place to another, which can happen unintentionally when the same cleaning supplies are used to clean multiple areas. This can be reduced by color-coding tools such as mops, brooms, buckets, gloves, sponges, brushes, and microfiber cloths.

## The Importance Of Organized Cleaning Carts

There are three areas of cleaning organizations that should be standardized to maximize efficiency and they all come back to the carts and caddies. Equipment, chemicals and procedures should all be standardized. Standardized cart organization means that any staff member can grab any cart and know exactly what they're getting.
