

# 1000 mL No Touch Dispensing System

9961BLK Black

9960GRA Dove Gray

## Top-dispensing in an automatic dispenser *Less waste when dispensed, no leaking at the valve*

The EZ Foam® No Touch is activated from the upper part of the dispenser, which lets users see the amount of product being dispensed and reduces waste caused by over-dispensing. And, by placing the valve at the top rather than the bottom of the dispenser, the risk of leaking at the valve is eliminated.

### **EZ Foam® No Touch also offers these advantages:**

- **Wide variety of Foam Hand Soaps and Hand Sanitizers**
- **Dispenses quickly when hand is placed under the sensor**
- **Uses 6 AA batteries (included) – no tools needed to change**
- **LED indicator lights up blue when dispensing and red when batteries are low**
- **Secured keyed locking option included**
- **Durable ABS plastic housing**
- **Large view window with product identification label**
- **Refill labels are in English, French and Spanish**
- **Easy to install and maintain**

Keyed locking option
