VALUE.**

Kutol[®] Pro Industrial Hand Care Program

In industrial environments, your hard workers' hands can take a beating. They are exposed to many tough, industrial soils and other chemicals while on the job. It's important to help protect your employees from these conditions by providing personal protective equipment and skin care solutions. Kutol[®] Pro offers a 3-Step Hand Care Program to help prepare, clean and restore dirty dry hands.

DERMATITIS

Worker Skin Health

Occupational dermatitis, the most prevalent industrial skin disease, is the inflammation of the skin caused by contact with damaging substances such as solvents, chemicals, irritants or sensitizers (allergens). Soreness, redness, and intense itching occur. In work environments where there is risk of exposure, proper skin care products should be used.

Workers should use protective gloves when necessary and wash their hands regularly, including before and after wearing gloves. Special hand creams, applied before and after work, help maintain proper skin condition. **The combination of cleansing hands and applying hand creams helps reduce the risk of occupational dermatitis.**

Kutol[®] Pro 3-Step Hand Care Program

STEP 1 PREPARE

Use **BEFORE WORK** Hand Cream at the beginning of the day to help repel and make it easier to wash away industrial soils from the skin.

STEP 2 CLEAN

Use a **Heavy Duty Hand Cleaner or Hand Wipe** to scrub away tough industrial soils throughout the workday.

STEP 3 RESTORE

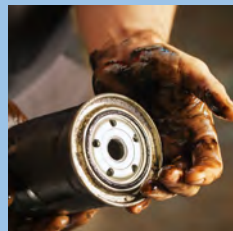

Use **AFTER WORK** Hand Cream at the end of the day to help soothe, moisturize and restore dry hands.

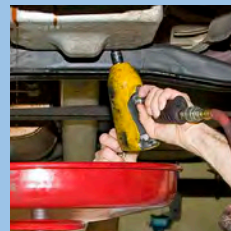

Effective on these heavy duty soils:

Tough Hand Cleaners for Tough Environments

Kutol® Pro Heavy Duty Hand Cleaners were formulated to outperform the competition in removing the toughest industrial soils in just one application, all while having low VOCs. Our wide selection of scrubbers, colors and fragrances means there is a Kutol® Pro product for any industrial application!

The Science Behind Heavy Duty Hand Cleaners

Solvents ...reduce the surface tension of water, disperse soils, and make unwanted particles easy to remove.

Surfactants ...help water spread out and attach to dirt molecules, enabling lifting and removal of dirt.

Natural Scrubbers...naturally-derived pumice, walnut shells and perlite, reach tiny places and scrub away tough soils.

Synthetic scrubbers ...wax-based paraffin is biodegradable and performs as well as plastic scrubbers.

Low VOCs ...all of our hand cleaners are under the 1% VOC (Volatile Organic Compound) limit, thus evaporate easily and are better for the environment.

Kutol® Pro hand cleaners have been precision-formulated with just the right blend of dirt removers!

		Soil Description

★ = Good ★★ = Better ★★★ = Best

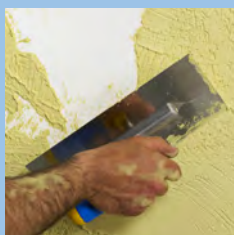

DuraView® Heavy Duty Wall Mount System 2 Liter & 4 Liter Cartridge

- HDPE (High Density Polyethylene) cartridge is extremely durable
- Reduces damage during shipment and withstands tough industrial use
- Both 2L and 4L use the same dispenser
- Translucent cartridge allows for easy viewing of soap level
- Easy refill – just remove the recyclable cartridge and lock the new one in place

Other Dispensing Options

All of our Heavy Duty Hand Cleaners are available in flat top gallons. Many formulas are also available in convenient pump gallons, portable 22 oz squeeze bottles and 3.5 L & 8 L large capacity refills.
