A Premium Release Pan Liner For
Environmentally Friendly Bakers!

You can have it all with EnviroBake®, a premium release, single-use pan liner for the new age of environmentally friendly bakers. EnviroBake® provides a superior level of release and heat resistance compared to quilon-treated pan liners, while meeting today's growing demand for environmentally friendly products.

A switch to EnviroBake® will help reduce loss and breakage due to sticking with tough bakes such as bagels and high sugar products. Frozen dough can be proofed on EnviroBake® and then used to bake on without sticking. EnviroBake® also eliminates labor costs associated with greasing pans and messy clean-ups.

Produced through an environmentally friendly process of mechanically beating TCF (Totally Chlorine Free) pulp, EnviroBake® is unbleached, compostable and contains no fluorocarbon components.

Important value-added features of this contemporary pan liner include its new, more natural looking color which creates an immediate impression of quality and environmental responsibility. EnviroBake® also maintains the same benefits of a high temperature bakery sheet at a low cost.

Reduce breakage, increase productivity, and address environmental concerns when you select EnviroBake®.
