

MAXIMIZE

Your Floor Care Program With Midlab's New Polished Concrete Care Product!

MAXIM[®] Polished Concrete Daily Cleaner & Protector

Maxim[®] Polished Concrete Daily Cleaner & Protector is a daily cleaner and floor densifier all in one! With regular use Midlab's new product can help prolong a floor's polished appearance.

Polished concrete is an absorbent surface, vulnerable to staining due to soil penetration. Maxim[®] Polished Concrete Daily Cleaner & Protector can guard against staining and soil penetration when used daily.

Benefits & Features

- ✓ Effectively cleans and removes oils and grime
- ✓ Densifies concrete with repeated use to prolong floor life
- ✓ Enhances stain resistance of floors with consistent use

MAXIM[®]

Has The Answer To Concrete Floor Care!

Why

Polished Concrete?

Polished concrete has become a popular choice within commercial construction over the last 20 years. The design of this type of flooring provides a low maintenance surface that is also aesthetically pleasing.

When customers enter a room, one of the first things they notice is the floor. A properly maintained, polished concrete floor can give customers an immediate feeling that the facility they are entering is clean and well maintained.

Investment

Polished concrete requires a large investment up front. Once the contractors leave, it's up to **YOU** to protect & maintain your floor. Without proper maintenance polished concrete floors are susceptible to staining & dulling in high traffic areas.

Maxim[®] Polished Concrete Daily Cleaner & Protector
protects your floor after the contractor leaves!
