

# TAD TOWELS Through-Air-Dry Technology

TAD technology removes water during production by pulling high temperature air through the sheet. By using air, paper manufacturers are able to maintain the fiber thickness and provide up to twice the bulk and absorption capacity for the same basis weight. TAD only uses virgin fibers providing a premium, softer product. With an emboss formed during the process, TAD provides users with a product ideal for cleaning spills, wiping down surfaces and hand drying.

**Premium Quality**

**Highly Absorbant**

**Softer than Conventional Towels**

## VT777

- 1" Core
