\*vs. other leading brands \*\* On hard, non-porous surfaces \*\*\*when used according to disinfection instructions \*\*\*\*effective against Clostridium difficile in 10 minutes with full strength (undiluted) product on pre-cleaned hard, non-porous surfaces §Not yet approved in CA ††See EPA master label for full list of organisms and contact times †††when product used per label instructions, effective against Pseudomonas aeruginosa, Staphylococcus aureus and Salmonella enterica

# Soil removal is a critical step in disinfection.

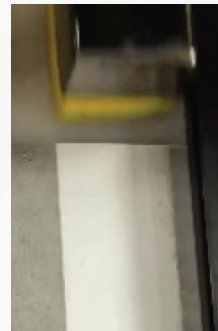

every experience counts.™

- An ineffective cleaner can leave soils/dirt behind. Not all disinfectants are effective cleaners. Both of these products are great/effective cleaners that can also disinfect.\*\*\*
- Experts show that thorough cleaning is required prior to disinfecting visibly soiled hard surfaces, but not all disinfectants effectively remove soil.†††

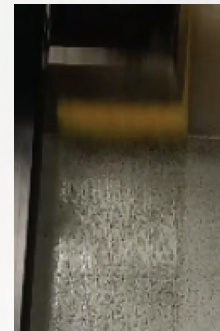

## Cleaning effectiveness on greasy soils after 12 strokes

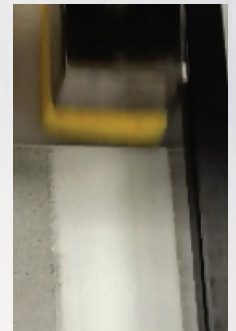

Leading peroxide multi-surface disinfectant

Spic and Span

Leading peroxide multi-surface disinfectant

Comet with Bleach
