HOW BIOTECH WORKS

1 >>>

When the toilet paper comes into contact with water, the **GOOD MICROORGANISMS** are activated - producing enzymes that feed on the offending organic matter present in the pipes and sewer system.

2 >>>

These microorganisms reproduce **EXPONENTIALLY** and **INTENSIFY THEIR CLEANING ACTION** even where it is not possible to intervene chemically or mechanically.

3 >>>

The good microorganisms contribute to reducing the bad microorganisms by consuming their food (**FOOD ANTAGONISM**) and further contribute to reducing the surfactants released by detergents in drainage pipes.

4 >>>

Once their action is finished, the **GOOD MICROORGANISMS FULLY BIODEGRADE**, meaning Bio Tech is 100% environmentally friendly.

5 >>>

It is **DERMATOLOGICALLY TESTED** and safe for skin, eyes and intimate areas of adults and children.

**PROTECT
YOUR PIPES
AND ELEVATE
YOUR BUSINESS.**
