

The Natural ChampWare™ product line offers a responsible solution for your customers' tableware needs.

These new item additions to our existing product line help provide your customers with the best reusable, renewable, and biodegradable options. Natural ChampWare™ products are naturally sourced using bagasse, a fibrous by-product of the sugarcane refining process. All Natural ChampWare™ items are recyclable and compostable in the limited areas where facilities exist. These items are moisture and grease resistant and the natural color makes a sustainable statement to your customers. The sturdy design provides a much stronger option than competitive products. **Contact your sales rep for more information.**
