

Turn the Dial on Hand Washing

Help Protect Your Staff with Dial® Professional Antibacterial Foaming Hand Soaps

The Brands You Know. Protection for Your Staff and Customers.

Bacteria can be the worst enemy to the food service industry. One way to fight off harmful bacteria is to eliminate it before it has a chance to spread. Dial® Professional can help. NSF E2 rated Dial Complete® and Dial® Clean + Gentle antibacterial foaming hand washes kill 99.99% of bacteria encountered in away-from-home settings. **And that's protection you can trust for your staff, customers and reputation.**

38%

Food workers with poor personal hygiene were contributing factors in up to 38% of foodborne illness outbreaks.¹

Dial® Detail

Tough yet Gentle

Just because our hydrating foam soaps are tough on bacteria does not mean they are tough on hands. In fact, Dial® Complete® is enriched with moisturizers and removes bacteria while being gentle on skin. And Dial® Clean + Gentle™ is specially formulated to hydrate and rinse clean without drying skin.

The Difference is Dial™

Turn the Dial on Hand Hygiene

While it's vital your employees practice proper hand hygiene at work, it's up to you to make it happen. Along with providing NSF E2 Rated Dial® Professional bacteria-fighting foaming soaps and easy-to-use dispensers, please consider the following:

Make it a Priority

When management enforces handwashing compliance as a mandatory requirement, employees are more likely to follow the requirement.

Motivate

Provide motivation for handwashing, which has proven to have an impact on improving handwashing compliance.

Remove Deterrents

Conveniently located handwashing sinks have a huge impact on handwashing compliance. Studies have found that availability of handwashing sinks supplied with soap and running water has a big influence on adoption; however, materials and practices that cause irritation to the skin can decrease handwashing occurrences. For example, excessive handwashing or use of harsh soaps can lead to skin irritation and subsequently decrease handwashing compliance.

Provide Positive Reinforcement

Rewards for compliance generally have a positive impact on increasing handwashing occurrences.
